TO THE PUBLIC

We, the Scouts and Scouters of Troops 102 and 84, wish to express our gratitude to the business men of this community who have responded so graciously with their co-operation to make this undertaking a financial success.

We would like to take this opportunity to invite the public to visit our Troop rooms at any time. We are endeavoring to create a Scouting program that will adequately take care of liesure time of the boys of this section. In order to do this we must have a proper place to meet, a place where the Scouts can call their own, a place where they can display the results of their efforts.

The proceeds of this enterprise will go to make this possible for both Troops, 102 and 84. Due to the lack of any other youth program in our section, such as the Y. M. C. A., it becomes the duty of our Scouting movement to take care of the liesure time of the boys and young men.

Since Scouting is definitely a preventative measure and not a corrective measure in regard to juvenile delinquency, there are no concrete records to show the real worth of Scouting to society, but to the thinking person, the same Scouting movement needs no defense because for twenty-seven years this program has stood the test and came through with flying colors. As a result of this, The Boy Scouts of America are one of the three great organizations which are chartered by the Congress of the United States.

THE NORTH STAR LEADS THE WAY

Our North Star District was born on October 23, 1936. Before that it was merely known as District No. 3, a name without inspiration or incentive.

The author of the name "NorthStar" was Mr. Louie Archer of Troop 99, Hilton. His contribution in giving us so inspiring a name has done much to enable us to create a program of real co-operation among our five Troops.

The first real activity entered into by the North Star was the celebration of Boy Scout Week, Feb. 7 to 13, of this year. During this time we had eleven store windows decorated showing the different phases of Scout work. We terminated this week of celebration on Saturday, Feb. 13, at which time we had as guests representatives from every Troop in the Council who met and organized the Senior Scout program of the Council. In the evening we had our big hobby show and district rally.

The headlight of the winter's activity was the organization of four new Troops of Scouts. Three of these are doing very good work under good leadership, and the fourth has been consolidated with the Spencerport Troop. Our membership has been increased from thirty-six Scouts and twelve Scouters to one hundred and fifteen Scouts and fifty Scouters. This was a season of organization and the next year will be devoted to creating a program and the study of personnel.

The first real district Hike was held in March. Five Troops were present and with a six mile hike through the woods, accompanied with a "Capture the Flag" game and the passing of many tests in woodcraft, we all felt that the old North Star District was really on its way.

The coming of summer brought on many week-end camping trips, where the boys of one Troop learned to co-operate with the boys of all the other Troops. We have gradually become one big family in Scouting, man and boy alike. Out in God's great out-of-doors we all walk on the same level. Age has no distinction. We learn to think of the other fellow and learn through the laws of nature to co-operate with him.

The test of stamina and grit was well displayed on our wilderness trip into the heart of the AdirondackMountains. Here Scouts and Scouters from seven Troops with packs on their backs penetrated 15 miles away from the road and lived like their ancestors of pioneer days.

The North Star District's activities have been in the past led by District Commissioner Frank Sprong, but since he has taken over the Scoutmastership of Troop 84, the District is being managed by, what we call, the Scoutmasters Round Table. With this setup we look forward to a real year of mutual understanding and co-operation between the boys of all our Troops.

MOUNT MARCY OR BUST

Picture, if you can, the spectacle of twenty Scouts and Scouters, heavy packs on their backs, canteens on their belts, starting single file up a rough mountain trail, bound for the wilds, fifteen miles away from the nearest road.

Months of planning were necessary for this to become a reality. Study was made of concentrated foods to last eight days. Plans were laid for supervision and safety. First aid equipment was very complete.

The personnel of this trip was made up of sixteen Scouts and four leaders. Each leader had a group of four Scouts, who with him, created a camp slightly separated from the rest. This system lent for more individuality and closer supervision. After three years of mountain trips we have arrived at the conclusion that this system can be followed with an unlimited number of Scouts.

The main objectives of this trip were several in number. First we realized that after one pack trip of this nature that a Scout would come out with the foundations of a real camper. We also wanted to find out what our boys were made of. Whether they could stand the hardships of the elements and the insects, the sore shoulders and rough trails. Almost to a Scout they came out with flying colors. We found out who we could depend upon in times of emergency.

Our Scouts had good experience in compass work, and following a contour map. They cut their own trails in certain sections in order to get to various mountain lakes, etc. They learned to prepare a good meal in a very short time. They learned the absolute necessity of full co-operation in order to prevent accidents.

The slogan "Marcy or Bust" was sung from every lip. Eight hours of hard climbing, generally through the rain of the upper clouds, was necessary before this became a reality. Our climb of Mt. Marcy in July of 1937 was made in unusuaully good weather. Our idea was to stay all night on the bleak summit and the climb was finished in the dark with the aid of flash lights. The night was cold and little sleep was had on the hard rocks but as the sun came up early in the morning, we beheld a scene none will ever forget. Mist in the valleys and mountain peaks towering up through the rays of sunlight made us thrill at the beauty of it.

The smell of the balsam needles, the exhiliration of the high altitude, flipping pancakes and making hunters stew, are a few of the things that we all miss. We look forward to the summer of 1938 and our next mountain trip. This will be bigger and better than ever. We will have a good many veterans to assist in planning and hope that the number of Scouts and Scouters in our expedition for next summer will be three times as many as ever before. We are having our first meeting to start our big plan, some time before Christmas. We look forward to paving the way for every Scout in the North Star District to be with us in our next climb up "Old Marcy."

TROOP 84, SPENCERPORT, OUR PLANS FOR 1938

Since Scouting is a liesure time activity, we plan to arrange our program with constructive work in service to others, specialized advancement in the fields we like best, and in the development of one hundred per cent loyalty to our Patrol and "Old 84" and the traditions for which she stands.

We plan to fit in our program with that of the Church, the School and the Home.

We aim to let that great Scout motto "Be Prepared" be our guide in all our activities whether in camp or at home.

Our first objective is to get every Scout on his way up that long trail, at the end of which stands that goal that every red-blooded boy aims for—**The Eagle.**

We want to make our program so varied that it will attract not only the younger boy but give the older chap a real desire to develop a particular phase of Scout work that appeals to him the most.

We definitely plan to put the "Out" in "Scouting." We look forward to every Scout being a real camper, with the ability to make a comfortable home in the woods with the least amount of time and energy.

Our main objectives for the next year are as follows:

1. **Every Scout in our Troop on the Mountain Hike next August.**
2. Every Scout become an expert swimmer as a result of the organized swims this winter at the Arnett Y. M. C. A.
3. 100 per cent attendance at Scout Meetings.
4. To keep the parents informed as to our activities and enlist their aid in various problems relating to the personnel of the Troop.
5. To create real sportsmanlike competition between the Patrols.
6. To make our Headquarters the best in the Red Jacket Council.

Putting the Out in s c OUTING

Scouting is three-fourths outing in two ways. In the word scouting, if the sc is left off, you have outing and three-fourths of the game of scouting is actually played outdoors. The important part of the indoors meetings is to plan for outdoor hikes and camping trips, where the knowledge that is gained is put into actual practice. That is the only way to really learn anything.

The only inside meetings that are needed in a troop are the troop meeting and a patrol meeting once a week. These should be held indoors only when the weather is bad. We try to hold as many outside during the Spring, Summer and Fall as possible. The patrol should have a hike at least once every two weeks and the whole troop should have one a month. On these hikes is where the tests should be passed. The only way to learn how to properly ditch and put up a tent and cook your own meals is by actual experience outside. When a scout is on his own, he learns to use the thing that are at hand to the best advantage because he knows the softer he makes his bed, the better he will sleep. These are a few of the reasons why we plan our program to keep outing three-fourths of scOUTING.

1938

TROOP 102, PARMA CORNERS

Organized March, 1937

Started with twelve Scouts and hope in the coming year to have complete troop of thirty-two Scouts.

Plan to have extensive outdoor camping program.

At least one overnight hike per month.

100% attendance at annual Red Jacket Council Camporee.

100% attendance at annual Adirondack Mountains trip, extending over a period of ten days of real pioneer life.

Hope to have 100% attendance at all district events, rallies, etc.

Money realized from the Minstrel Show is to be used to buy camping and cooking equipment for each patrol in troop.

Hope to establish and equip a permanent Headquarters.

Hope to have a fully uniformed troop in a year's time.

Hope to have a brisk advancement schedule with every boy advancing at least one rank by end of year.
